The Smart Office Computing Solution For Small Business

RadiantOne Convergent Networks consolidates your IT resources into a hosted and converged voice and data managed solution over one network so that your company staff can focus more on core business and customers, and less on non-core IT services.

The Zero Maintenance Business Computing System

Eliminates the need to purchase and continuously upgrade computer hardware and operating systems.

A tamper and virus resistant Data Access Terminal plus 15" or 17" LCD Monitor replaces the desktop PC.

Traditional MS Office or economical and compatible StarOffice Productivity Suite.

Power Protected devices work during outages.

Triple encrypted communication plus complete Security Management.

Compatible with most business and POS applications.

Managed file and data protection plus complete license management.

Allows the customer complete freedom to focus on their business instead of fighting with computer technology.

Leverages best practice and technical expertise from companies dedicated to delivering 100% service availability
Leave out the last point if it does not fit.

Starting from only \$170/mth per User
